4 10 Mhz Shortwave Radio - gallery.ctsnet.org

The 10-meter band is a portion of the shortwave radio spectrum internationally allocated to amateur radio and amateur satellite use on a primary basis. The band consists of frequencies stretching from 28.000 to 29.700 MHz.

10-meter band - Wikipedia

Shortwave radio is radio transmission using shortwave radio frequencies. There is no official definition of the band, but the range always includes all of the high frequency band (HF), which extends from 3 – 30 MHz (100 to 10 metres); above the medium frequency band (MF), to the bottom of the VHF band.
