VANILLA Post-harvest Operations - Post-harvest Compendium

To harvest, use a sharp blade to cut the mango from the branch, then place the fruits in a picking pole with a net at the end. When harvesting mangoes, farmer can stand on lightweight movable racks. The best time to harvest mangoes is from 9a.m. to 3p.m. to minimize the flow of latex sap from the small stem left on the fruit.

Backgrounder: Reducing post-harvest losses in mango - Farm ...

Dip the fruits for three to five minutes in hot water (52-55 C) to which 500-1000 ppm benomyl has been added. This will minimize post harvest infections. Control weeds and other undergrowth beneath the tree to reduce humidity, increase ventilation and discourage the growth of the fungus.

Compendium of Diseases: Mango | HubPages

Generally, harvest maturity in mango is reached about 12 to 16 weeks after fruit set.

Computing the age of the fruit is one of the simplest factors that can be used for harvest.
