The trickier application form questions can be daunting at first, but with some practice you can learn how to ensure that your answers impress recruiters. Some sections of a job application form will only need straightforward factual answers, such as your personal details or education history. Others sections will demand you work a little harder.

~~Example questions and answers | Prospects.ac.uk~~

Given a conception of relevance, two measures have been applied: Precision and recall : Recall = a : (a + c) X 100%, where a = number of retrieved, relevant documents, c = number of non-retrieved, relevant documents (sometimes termed "silence"). Recall is thus an expression of how exhaustive a search for documents is.

~~Relevance - Wikipedia~~

There are many ways of determining relevance in a search application, ranging from low cost to expensive. Some are better than others, but none are absolute. To determine relevance, you need at least three things: A collection of documents; A set of queries; A set of relevance judgments

Search Engine Strategies. When you first use a search engine to look up the answer to a question or to begin a research project, you will notice something: Some of the results you receive are relevant and some are not. This happens because search engines all have different rules about how the search engine results will be listed.
