Religion within the Bounds of Bare Reason is a 1793 book by the German philosopher Immanuel Kant. Although its purpose and original intent has become a matter of some dispute, the book's immense and lasting influence on the history of theology and the philosophy of religion is indisputable. It consists of four parts, called "Pieces", originally written as a series of four journal articles. He strongly criticises ritual, superstition and a church hierarchy in this work.

Kant says there are three kinds of religious delusions, all of which we should avoid. We should not believe in miracles, since we do not have direct, scientific evidence of miracles occurring today or in the days of old. Kant also speaks against religious mysteries, since, like miracles, their existence cannot be proven "through reason" (6:194). Finally, we should not believe that religious rituals or professions of faith will make us more righteous in God's eyes.
